

Verity Scan

Secure Vote Capture

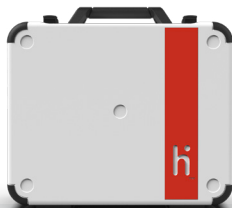

Scan + Cast

Digital scanning solution for paper ballots marked by machine or hand.

Triple Redundancy – Verity Scan stores cast vote records on the removable media device and on the Scan unit itself. A third redundancy is the printed paper vote record.

Citizen Voting Experience

That Was Easy

Voters mark their ballot, by machine or hand, and feed the ballot directly into Verity Scan. Green landing lights, on-screen directions, and tactile guides instruct the voter when and where to insert the ballot into Verity Scan.

I Saw My Vote

Verity products never tabulate votes from a barcode. Scan captures precisely what the voter verified and intended.

It Was Easy To Scan

Accept ballots header first, footer first, face-up, or face down. Scans both sides of a ballot quickly and accurately.

I Know It Scanned

In the unlikely event that a ballot jam occurs, the ballot track is easy to clear, and the device indicates in an alert message letting you know if the ballot scanned.

Everyone Was Voting

Unlike other technologies, Verity Scan is at wheelchair accessible height.

Verity Scan with Verity Ballot Box

The ballot box collapses to six inches thin for easy transport and efficient storage. Unlike other scanners and ballot boxes, Verity Scan is accessible to a voter, whether standing or seated.

Jam-Free Ballot Feeding

Easy scanning for voters and less work for poll workers.

Speed Lines

Plain-language instructions, patented animated guide lights and simultaneous top and bottom scanning.

Easy Second Chances, Fewer Frustrated Voters

Election Administration Experience continues

Prevent Mistakes

Intelligent scanning restricts provisional ballots from being cast without poll worker intervention. Accept ballots with unique identifiers to ensure that no ballot can be scanned more than once.

Secure, Redundant Data

Digitally signed vote data is protected by two-factor authentication and stored in multiple locations. Physically separate storage locations for ballot images, printed paper records and audit logs assure officials that voting data is safe. A third redundancy is the printed paper vote record.
